## Chamber of Commerce Hold Meeting Will Hold Special Session May 9th

The Chinook Chamber of Commerce held their monthly meeting in the dining room of the Chinook Hotel on Monday evening. A fairly large representative of officers and members were present. Vice-president Mr. W. A. Hurley, occupied the chair, with Mr. E. E. Jacques filling the secretary's position.

Minutes of previous meeting read and adopted.

Butts — Murray — That a committee consisting of Mumford, Lee, and Jacques be appointed to wait upon M. L. Chapman regarding his non-appearance at the meeting.

The chairman of the above committee, Mr. Mumford, reported and read Mr. Chapman's resignation.

McFavish — J. Cooley — That Mr. Chapman's resignation as secretary be accepted. Carried.

McFavish — Butts — That A. V. Youell be appointed secretary. Carried.

The following committee: Messrs. Mumford, Murray, L. Cooley, Vanhook and Lee, were appointed a committee to report upon a suitable location for an auto camp and the cost of same.

McFavish — Meade — That a committee be appointed to ascertain the best means to induce settlers to locate in this district, and that the committee get in touch with Lorne Proudfoot, M.L.A., and ask for his co-operation.

Mumford — McFavish — That the secretary be instructed to see what arrangements could be made in regards to renting the Masonic Hall for future Chamber of Commerce meetings. Carried.

L. Cooley — Butts — That a special meeting, at which all officers, directors and members are urgently requested to attend, be held Monday evening, May 9th. Carried.

Mumford — That meeting now adjourn.

## Another Family to Welcome Back

Mr. and Mrs. D. R. Gilbert, of the Stettler district, arrived in Cereal last week and for several days have been looking for a suitable farm. They have rented the Graves' place, west of town, and are negotiating for the old L. K. Skully farm.

It speaks well for a district when farmers, who have moved from this district with the opinion that they will better their circumstances, and having tried it out for a number of years, decide to return. This is the second farmer who has returned from the Stettler district this spring, one has settled in Chinook and the other in Cereal.

## Retlaw Prepares For School Fair

Preparations for the Retlaw-Vauxhall and districts annual school fair, which will be held some time in September, have been going on for some time. The executive and secretary have devoted a great deal of time in obtaining donations and material for the prize lists.

Enough material has already been obtained and the lists will be sent to the printers soon. Seed application forms have been filled out by the school children and from the amount of seeds needed this year it seems that the vegetable exhibits will outnumber last year's. Needless to say from the amount of prizes already received the fair will again go over the top.

## Chinook Hotel's Week-End Dances

In spite of the severe bad road conditions it was surprising to see the large turn-out of farmers, some coming for miles, to attend the free Saturday evening dance which is held in the Chinook hotel ballroom every Saturday evening, and least, but not forgotten, the splendid turn out from our neighboring towns, especially Cereal and Youngstown, who responded in extraordinary large numbers and which was very much appreciated by the proprietor, even more so because the trip here and back was made in terrible roads and a heavy rain.

In order to convince our many farmer and nearby town friends that their patronage is appreciated, I have decided to absorb the tax and give free table reservation just by buying a lunch ticket, which only costs twenty-five cents.

I also wish to take this opportunity to thank the Gingles family for their turn out and for their valuable assistance to the local orchestra. Indeed, it was very gratifying to see such harmony and good-will spirit existing and wished the same existed as a whole amongst our local people and merchants.

I am yours for a jolly good time and the spirit of real common sense friendship.

Capt Peters.

One day a ducky was giving another ducky brother a lesson on ignorance. 'Yo' is so dumb he said, dat if yo' brains was ink an' somebody done used yo' nose fo' a fountain pen, dey couldn't even make a period.

## \$3000.00 GOOD YEAR PRIZE CONTEST

Anyone from a family where a car is owned may enter, except tire dealers, employees of rubber companies and the families of both.

See the six Good Year Tires of various sizes, types and ply-thicknesses on display here. Then estimate the number of cords in each of these tires, find a total, and divide by six to obtain the average. You may examine, too, a section of tire cord fabric also on display. Submit your estimate on the standard entry blank which is free. No other requirement. You don't have to buy anything.

Closing date: June 5th, 1932. Address: "The Good Year Supertwist Cord Contest," New Toronto, Toronto 14, Ontario.

HOW MANY SUPERTWIST CORDS

IN THE AVERAGE GOOD YEAR TIRE?

**SERVICE GARAGE  
COOLEY BROS.**

# Canada Fortunate In Offering A Wide Variety Of Attractions In Word's Greatest Playground

The majority of Canadians probably do not realize what a wonderful choice of vacation opportunities this country offers. How many of us in any one province have first-hand knowledge of the wide range of attractions of our neighboring provinces? Many no doubt, have gone abroad to seek a holiday, forgetting that our own Dominion is unequalled in the exceptional variety and range of its recreational resources. Surely a country which attracts visitors from other countries by the tens of millions must have recreational features of interest to its own citizens.

It is so easy to travel in Canada that an interprovincial tour is a pleasure which every Canadian vacationist may well and profitably undertake. All the developed and

variety of accommodation. On the Atlantic coast, in the provinces of New Brunswick, Nova Scotia and Prince Edward Island, are typical sea-shore resorts, where salt-water bathing, sailing and deep sea fishing are the principal attractions. The rugged beauty of this coast and the picturesque charm of the fishing villages, at the head of every inlet, cannot fail to enchant the summer visitor.

Quebec's summer playgrounds are of the most varied nature including as they do, sea-shore, mountain, lake and forest resorts. Along the lower St. Lawrence, summer colonies have been established at many points. North of the St. Lawrence and Ottawa Rivers the Laurentian mountains, clothed with pine forests and dotted

much of the undeveloped part of the Dominion is easily accessible by train, boat, or automobile. Canada is served by two of the world's greatest railway systems and a number of smaller lines. The equipment and service are of the highest standard. Steamers built specially for pleasure cruising afford many pleasant trips along the coast and on the extensive inland water system of lakes, rivers and canals. A cruise from the head of the Great Lakes to the Maritime Provinces is nearly equal, in distance, to an ocean voyage. Good roads lead to practically all scenic and sporting territories. Canada's road system includes many thousands of miles of surfaced highways, well equipped with direction signs and danger signals. Tourist accommodation, from campsite to hotel, is available almost everywhere.

National and provincial parks in Canada cover nearly 25,000 square miles. They are areas which have been withdrawn from exploitation and are being preserved in their virgin beauty and wildness, for purposes of pleasure and recreation. The largest national parks are in the Rocky Mountains section of Alberta, a region of unsurpassed scenic splendour admirably equipped by nature for all forms of sport and recreation. There are also important parks in British Columbia, Saskatchewan, Manitoba, Ontario and Quebec. Accommodation ranges all the way from large modern hotels, to log cabins and tents. Fishing is one of the chief attractions in the parks, but game animals and birds are rightly protected and their fearlessness never fails to interest visitors.

Throughout the Dominion there are many summer resort districts which offer a wide range of attraction and

Many Like Him

A negro applied for a job, and set forth his attributes without too much modesty. "All right," said the boss, "you can have a job; and as to salary, well, I'll pay you just whatever you're worth." "Dat's no use to me, sah," said the applicant decidedly. "The gettin' mon dat where I is now."

Back To Nature

"Just fancy grandma," said the girl; "I had my second flying lesson to-day and it won't be long before I'll be able to take you to the country in my airplane." "You won't do anything of the kind," said her grandmother, grimly. "When I want to go to the country, I'll go by train, as Providence intended us to."

## Subvention On Coal

Amount Payable On Bituminous Coal Shipments To Manitoba Has Been Reduced

The maximum subvention payable on bituminous coal shipments by operators to Manitoba had been reduced from \$1.50 to \$1.20 per ton, Hon. W. A. Gordon, Minister of Mines has announced. The reduction is to place all operators who ship to Manitoba on an equality without endangering the markets to Canadian coal from foreign competition.

Action follows consideration by the minister of representations made by the bituminous coal operators of the Crow's Nest Pass district. It is stated that these representations showed that the subvention order of 1931 placed the southern Alberta coal field at a disadvantage, as compared with the northern field in the Manitoba market.

Acceptances that have been granted prior to April 15, 1932, it is stated, will continue to be in force under the old maximum until the tonnages specified have been shipped.

## The Farm Poultry Flock

Few Departments Of Farming That Give Higher Returns

"Poultry is at last definitely recognized as one of the essential departments of every up-to-date farm where a program of mixed farming is carried on," states George Robertson, Assistant Dominion Poultry Husbandman.

"Not only is it recognized as a necessary department of farm work but more and more farmers are coming to realize that for the capital invested and labour involved there are few if any departments that give as high returns. For the mixed farm, general purpose breeds such as the Plymouth Rocks, which are good both for laying and for the production of market poultry, are recommended. A flock of a hundred such birds carefully managed are returning to one farmer a profit over cost of feed, of from \$200 to \$300 a year, which is something not to be dismissed by even the most successful farmers."

According to an American professor at the University of Nanking, China, there have been 2,000 families in north and east central China during the past 2,000 years.

WIFE (to burglar hubby, leaving for a "job")—"And don't be away as long as you were last time—four blinkin' years!"—The Humorist, London, England.

# Urges Government Control Of Production Of Radium From Great Bear Lake Pitchblende

To consider the production of radium from pitchblende ore in the Great Bear Lake as a mining industry employing any large number of men was an "absurdity." This declaration was made in the senate by General A. D. McRae, Vancouver.

After speaking of the recent discoveries in the Great Bear Lake section, and the richness in supply of these high-grade pitchblende, the mother ore from which radium is obtained, Senator McRae declared: "I give these figures to show the absurdity of considering the production of radium from our pitchblende ore as a mining industry. Pitchblende is a medicinal ore, required chiefly for medicinal purposes. Not by the greatest stretch of the imagination can it be pictured as an industry which will employ any considerable number of men, or be of great commercial value to the country."

"The silver deposits in this district are phenomenal. As pitchblende is generally associated with silver ore it is possible that when mining is well under way more pitchblende will be produced in connection with the mining of silver than the world then requires, and consequently our government may some day have to make provision for conservation of surplus pitchblende. He would be a very foolish prospector who would now go into the Great Bear Lake district in search of more pitchblende."

General McRae was addressing a crowded chamber in support of his resolution urging government control of the production and distribution of all radium procured from Canadian ores. Appointment of a Canadian radium commission to investigate and recommend at the next session of parliament the best methods of such control—"to give suffering humanity the greatest boon of an ample supply of radium at a moderate cost"—was advocated by the British Columbia senator.

Present control of radium by the "Belgian Trust" at an "excessive price" produced a scarcity of radium. General McRae stated while more deaths were caused by cancer than through any other disease. He considered that the government might well consider reserving all pitchblende from further stakings, and this would not interfere in the least with the mineral development of the North West Territories.

"As to claims already staked, asserted Senator McRae, "it is agreed the holders should be generously treated. However, as the government, through its radium commission, must carry on the necessary education and regulate the distribution of radium so as to confine it to qualified users, it will probably be found that the government will either carry on the manufacture under the direction of the department of mines—a very efficient staff—or through the agency of some controlled private corporation, or perhaps under the direction of a permanent Canadian radium commission.

"In this event the arbitrary price at the mines, which, for my immediate calculations, I have adopted as \$100 a ton—five times the gold recovered per ton by the Lake Shore mines, one of the greatest gold mines in the world—should prove an equitable if not too generous an allowance to the people who have already staked claims. Of course, this is vastly different from the values now being talked. There is 50 tons of this ore now in Ottawa. It will probably produce, if manufactured, two grams of radium worth \$100,000; that is the Belgian wholesale price of two grams of manufactured radium. Surely we are not going to start in on this basis

in Canada. It is unthinkable that we should allow the pitchblende deposits of the Great Bear Lake to be developed on a basis which will enable Canadians to join with the Belgians as exploiters of suffering humanity."

After considerable investigation, General McRae said, he was very much impressed with the seriousness of the present situation in regard to the shortage of radium, "a shortage which is costing the lives of tens of thousands of cancer victims annually." He was enthusiastic of the opportunity which it would appear from government reports, "Canada has to step in and correct this world-wide situation and give to suffering humanity this great boon—an ample supply of radium at a moderate price."

## The Flax-Seed Industry

Flax Grown Throughout Canada For Seed Rather Than For Fibre

Flax is a crop which is at present receiving quite a bit of attention by farmers throughout the Dominion. There are two principal uses for the crop, fibre and seed. Varieties giving the best fibre are not so well suited to seed production and, at the present time, the bulk of Canadian production is devoted to flax-seed, which has reached an average of over 3,000,000 bushels annually. Some two and a half million bushels of this volume are used domestically in the manufacture of linseed oil. The varieties which are being specially developed throughout the Dominion at the present time are those which offer greatest value from the standpoint of quality of seed and high percentage of oil content.—Department of Agriculture, Ottawa.

## Cost Of Education

Britain Spends Huge Sums For Educational Purposes

Nearly \$100,000,000 is now being raised from the tobacco and tax levies sources for expenditure on education in Britain, Sir Donald MacLean, president of the Board of Education, told the House of Commons when he submitted the board's estimates.

Sir Donald declared the reduction of 10 per cent. in teachers' salaries effected last autumn was not to be regarded as the government's view of the proper remuneration for teachers under less abnormal conditions. The position would be reviewed when the financial position of the country allowed, he promised.

At the same time Sir Donald reminded the House that British teachers were better remunerated than teachers in Europe.

## Get the Right Fertilizer

Good Time To Consult the Soil and Crop Authorities

Never in the history of Canadian agriculture has it been more important for the farmer to be absolutely sure that he is getting the right kind of fertilizer for his crops than at the present time. Grant S. Peart, Chief of the Fertilizer Division of the Soils Branch, observes: "In many parts of Canada the farmer is still sold fertilizer as recommended by local agents instead of buying it on the basis of his own knowledge of its proper use. As never before this would appear to be a good time to consult the soil and crop authorities. In many parts of Canada the farmer is still sold fertilizer as recommended by local agents instead of buying it on the basis of his own knowledge of its proper use. ## PUT HIM OFF HIS PIPE

## Indigestion and Acidity

"A few months ago, I had an attack of indigestion, heartburn and acidity, and had no appetite for meals, especially breakfast. I am a pipe smoker, and for several days I felt so ill I could not even look at my pipe. I decided to try Kruschen Salts. A few days afterwards I found that the heartburn and acidity had gone, and for the last five or six weeks I have been in my usual good health. I can now enjoy my pipe-smoking, and in fact feel about 10 years younger."—R. P.

When your digestive juices fail to flow freely your food lies in the system and ferments, thus causing the distress of indigestion. The "little daily dose" of Kruschen first stimulates the flow of the gastric juices, and then ensures complete, regular and unflinching elimination of all waste matter every day.

## WORLD HAPPENINGS BRIEFLY TOLD

Pure diamonds have been created artificially in the laboratory of Columbia University.

Germany's unemployed at the end of March numbered 6,031,000, a decrease of 98,000 in two weeks.

Dr. Hartley Travers Farrar, geologist, who accompanied Captain Scott on his expedition to the South Pole in 1901-04, is dead.

Dr. John Stanley Plaskett, astronomer, will receive an honorary degree from McGill University at the 1932 spring convocation.

Samuel McKay, noted Indian fighter and buffalo hunter, died at Wild Horse, Alberta, recently. He was born in Winnipeg in December, 1852.

It was learned on good authority that Turkey was ready to become a member of the League of Nations and an invitation probably will be issued this year.

Lord Irwin, former viceroy of India, sailed on the "Empress of Australia" for a lecture tour in Canada under the auspices of the Massey Foundation.

An ambulance had been opened at Tarpot's Corner, near Southend, England, on the London-Southend Road, where 364 accidents have occurred in the last 12 months.

Rear-Admiral Sir Godfrey Payne, who died at the age of 90, was buried at sea off the life of Wight, after a service in the dockyard church, Portsmouth, England.

Canada's export of wheat during the eight months of the present crop year ended in March was 124,269,420 bushels. Of that amount 71,505,107 bushels went to the United Kingdom.

## Canada Steamship Lines

Veteran St. Lawrence River Captain Is Appointed Skipper of the S.S. "Tadoussac"

Beginning his 42nd year as Captain on the St. Lawrence River, Wilfrid Gagne is again named skipper of the s.s. "Tadoussac" in passenger fleet appointments announced by the Canada Steamship Lines.

Born in Point Au Pic, Quebec, a short distance from the Manoir Richelieu, Captain Gagne has spent almost his entire life on the St. Lawrence and Saguenay Rivers and is said to know every turn by heart. During the war Captain Gagne's knowledge of the river was put to good effect as he was given the unique and valuable work of piloting submarines from Quebec to Murray Bay, on their way to the sea. The father of eleven children, Captain Gagne is one of the best known residents of Point Au Pic.

Another veteran's appointment is also included in the announcement recently as Captain Peter McKay, skipper of the s.s. "Noronic," flagship of the Canada Steamship Lines Northern Fleet, again takes charge of the largest upper lakes liner. Captain McKay last year piloted the "Noronic" when she made her historic cruise through the New Welland Ship Canal, and became the largest passenger steamer ever to have entered Lake Ontario.

"Crying like that because she has lost her mother-in-law!"

"Yes, poor girl. She had just bought such a lot of pretty frocks for the summer!"—Il Travaso, Rome.

W. N. U. 1939

## A Seed Field On the Farm

Better Wheat Brings More Money To the Farmer

(By H. G. L. Strange)

The easiest money to be made by the Canadian farmer is in premium grains. Grains of high quality, as the work and expense of summerfallowing, seeding, harvesting, threshing and hauling is no more for a high quality crop, that commands a high grade and so the best price, than for a low quality crop which brings a lower price because of lower grades.

The best Canadian wheat on the world's markets at this moment commands a premium of 17 cents a bushel over the best Argentine or Russian wheat. This is due entirely to the higher quality of Canadian wheat, which quality is due somewhat to the soil and climate of Western Canada, but mainly to the use of that proper variety in each district that will produce marketed grain. This premium for Canadian wheat to the last fraction of a cent is reflected directly back to the Canadian farmer at the local elevator by Grain Elevator Companies. A high quality crop that brings a high grade, and so the full price, can easily be produced by any farmer who will use the most suitable variety for his farm and district and who in addition will use that seed that is reasonably true to that variety.

A recent survey made by the Searle Grain Company in co-operation with the Dominion Experimental Farms, of wheat being marketed at the country elevator, indicated without a doubt that a large number of farmers are losing grades and so good money for themselves, because their crops consisted of a mixture of inferior varieties instead of being reasonably true to the one most suitable variety.

The first step is to decide upon the most suitable variety to use. Only the farmer himself with a detailed knowledge of his own farm can make this decision, but it can be said that if Marquis wheat can be ripened, say four years out of five, without being frost-killed, and if it will produce a kernel that is clear and not starchy, and so in consequence will grade usually No. 1 Northern, that no other variety should be grown, because under these circumstances Marquis has more money-making qualities for the farmer than any other variety.

In some districts, however, early fall frosts often degrade Marquis wheat and in some of the northerly parts of Alberta and Saskatchewan, particularly where brush has been growing, Marquis produces a plebeian and starchy kernel that only grades a number 3. Under these circumstances, the farmer should consider an earlier variety or one that will throw a clear kernel, although some are finding that the use of fertilizer with Marquis wheat, ripening it from 6 to 8 days earlier, often allows Marquis to escape these early frosts and in many districts also helps to produce a clear kernel.

Three early varieties are recommended—Red Bobs, 222—Reward and Garnet.

Red Bobs 222 is 6 to 7 days earlier than Marquis, yields almost as high in some districts higher, but is as starchy as Marquis and often shatters in a dry fall. In some districts, however, this variety is very popular. Garnet is some ten days earlier than Marquis, gives a bright clear kernel and is almost as high yielding as Marquis, but it has a weak straw and sprouts easily in the stock in a wet fall; the milling and baking values of Garnet are different from those of Marquis, and Garnet flour is slightly yellow. The exact future of the grading of Garnet at this time seems uncertain.

Reward wheat is strongly recommended. It has high milling and baking values quite equal to Marquis. The straw is stiff, it does not shatter, nor sprout easily. It contains a little loose smut, which, however, can be controlled, but the yield on the average is lower than that of Marquis or Garnet, although many farmers report that the yield of Reward is much increased when half a bushel more to the acre is seeded than is usual with Marquis or Garnet.

## "Audible Light" Created

Phonograph Produces Music As Beam From Lamp Hits It

By means of a photo-electric cell, John Bellamy Taylor, consulting engineer for the General Electric Company, demonstrated the creation of "audible light" before a group of scientists at Detroit. He used a silent phonograph and sensitive incandescent lamp to produce what he termed "one of the newest developments in electro-physical research."

In his demonstration, Mr. Taylor brought the music of a stringed orchestra from the phonograph and then silenced it by placing his hand between the lamp and electric cell.

SWANK LITTLE SPORTS TYPE THAT THE SUBBER WILL LOVE

A school girl frock of deep bright blue woolen, assumes a military air through its gay vivid red trim.

Note the attractively shaped collar that is partially responsible for its smart individuality. The circular sleeve caps are also details of the dress buttons tone with the collar and sleeve cuffs.

It follows the adult mode in the wrapped movement at the front. The right side of skirt is laid in plaits, a youthful idea to give ample width to the hem.

It's so easily fashioned. The saving over the original Paris model is enormous.

Style No. 715 is designed in sizes 11, 13, 15 and 17 years. Size 15 requires 3 1/2 yards of 35-inch material with 3/4 yard of 35-inch contrasting Wool jersey, rayon novelties, wool-type cottons and flat crepe silk in plain or print are nice mediums.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## SUNDAY SCHOOL LESSON

MAY 1

ISAAC AND HIS WELLS

Golden Text: "A soft answer turneth away wrath; but a grievous word stirreth up anger."—Proverbs 15:1.

Lesson: Genesis 24:12-25.

Devotional Reading: Matthew 5:1-12.

## Explanations and Comments

Isaac's Prosperity and His Result, verses 12-17.—A hundredfold was the yield which Isaac obtained from his sowing, and so great were his possessions in flocks and herds, and so great was his household, that the Philistines envied him. Their envy led them to fill up the wells which Abraham his father had dug, and Abimelech, their king, ordered Isaac to leave. Without wells Isaac could not support his livestock, and although, as his enemies admitted, he was stronger than they, he would not contend with them but moved on and erected his camp in the Valley of Gerar.

"It used to be a mark of a gentleman that he would instantly resent an encroachment on his rights, and pick a quarrel at a moment's notice. Today that would be a mark of ill-breeding. Where education and Christian culture have done their fullest work, there is most patience and gentleness."

Trouble At Gerar, verses 18-21.—Isaac re-dug the wells made by Abraham which the Philistines had stopped up, and called them by the original names. In digging for a new well in the valley he found "a well of springs water," for the underground stream was tapped which flows below the rock through the valley past Hebron and Gerar and Beersheba. Trouble then arose, for the herdsmen of Gerar claimed it. Isaac called that well "Esek," which means "Contention," and patiently dug another one. For that the others contended also, and Isaac called it "Sitnah," which means "Hated." It is our ignorance of patriarchal life which makes us think it unreasonable to hear, in those early days, of so many contests about wells; for on nearer inspection we should find that in their arid regions a well of springing water was a possession of inestimable value. Hence we later find Moses, in magnifying the Divine bounty to the children of Israel, among other parts of the inventory, which makes us think it unreasonable to hear, in those early days, of so many contests about wells; for on nearer inspection we should find that in their arid regions a well of springing water was a possession of inestimable value. Hence we later find Moses, in magnifying the Divine bounty to the children of Israel, among other parts of the inventory, which makes us think it unreasonable to hear, in those early days, of so many contests about wells; for on nearer inspection we should find that in their arid regions a well of springing water was a possession of inestimable value. ## FARMERS WILL MEET TO DISCUSS ECONOMIC PLIGHT

Winnipeg, Man.—Arrangements are already under way for a conference of western Canadian farm organizations and government with a view to preparing submissions for the Imperial Economic Conference. The meeting will be held in Regina, June 8, and arises out of a resolution passed by the Saskatchewan legislature.

Sponsored by the Premier of Saskatchewan, Hon. J. T. M. Anderson, and his ministers, the gathering as at present planned will consider only the point of view of western agriculture. The provinces of Alberta and Manitoba will be invited to send representatives.

Whether a broadening out of the Regina conference to include agricultural interests of all provinces which would carry out the suggestion of an all-Canada meeting advanced by Oneida Gagnon in the House of Commons, would be considered could not be learned. In general, however, it would not likely meet with much opposition.

United Farmer organizations in all three prairie provinces have recently approached farm organizations in eastern Canada with a view to getting together to evolve a common policy in the interests of Canadian agriculture.

## Advisory Committee On Research Work

To Give Direction To Scientific Agriculturists Throughout Canada

Winnipeg, Man.—Creation of a new advisory committee on agricultural research to co-ordinate and give direction to the work of scientific agriculturists throughout Canada was announced Thursday, April 20, by Dr. H. M. Tuxford, chairman of the National Research Council. He said authority for setting up the committee had been given by the Dominion Government and the personnel would be announced shortly.

The new national committee will be representative of the research institutions of Canada including the agricultural research departments of the Dominion Government. It will meet annually or oftener to review general problems, recommend methods of attack and develop for the benefit of the proper authorities a picture of the agricultural situation.

Designed as a further step to secure co-operation among research organizations, Dr. Tuxford expects the committee without increasing costs will enlarge the output of scientific research in Canada. He predicted the co-operative plan the national research council has been promoting during the last 10 years would increase the results of research by 30 per cent.

As an instance of the benefits of co-ordinating research work, he said the results now reported in connection with wheat rust might have been delayed for 20 years without the co-ordinating efforts of the associate committee, on field crop diseases.

## To Prepare Report

Hearing Of Evidence In Radio Probe Is Completed

Ottawa, Ont.—The future of Canadian broadcasting so far as public submissions are concerned, rests with the parliamentary broadcasting committee which has completed the hearing of evidence started on March 8 last.

The committee will commence private sittings shortly to prepare a report which will be submitted to parliament.

## Build Village For Athletes

Los Angeles, Calif.—Like the ghost towns of the old gold rush days in California, there has grown in the Baldwin Hills, near here a cluster of 650 houses in less than three weeks. It is the Olympic village, where some 2,000 of the world's picked athletes will live for a few weeks this summer. The last of the houses has been erected.

## French Aviators Beat Record

London, Eng.—The Reuters News Agency reports that the French aviators Goulette and Saliel had flown from Le Bourget, France, to Cape Town, South Africa, in 61 hours, or about 22 hours less than the recent record time of J. A. Mollison, British flyer, from Lympe, England. The French fliers arrived at Cape Town April 20.

## Mine Shaft Extended Into Saskatchewan

Flin Flon Development Should Encourage Mining In Province

Regina, Sask.—The shaft of the huge Hudson Bay Mining and Smelting Company Mine at the Flin Flon now extends over the Saskatchewan border, according to Major J. Barnett, Deputy Minister of Natural Resources for the Province. Hitherto all the mining for copper, zinc and gold which has been done has been on the Manitoba side.

Major Barnett has returned from a visit to the northland and at the Hudson Bay Junction held conference with field men of the Department on forest fires and other work to be carried out in the north this season.

The extension of the shaft over the Saskatchewan border and the subsequent mining, should encourage smaller mines to start up in the opinion of Major Barnett. The presence of the \$30,000,000 plant of the mining company will enable the smaller mine in Saskatchewan to use the facilities in processing the raw material.

The mine is now working the full 24 hour shift, and there is considerable activity at that point.

## Would Pool Railway Operations

Operating Board To Run The Two Systems Suggested By Conservative Members

Ottawa, Ont.—Pooling of the operations of the Canadian National and Canadian Pacific Railways, with a resultant saving of possibly \$80,000,000 a year, was the suggestion thrown into the budget debate in the House of Commons. The appointment of an operating board to run the two systems as one, with consequent elimination of waste and duplication, was held up as a possible temporary solution of the serious transportation problem which Canada is faced. While operations would be pooled, the roads would remain as distinct entities. The properties would stay just as they are today.

J. T. Hackett (Conservative, Standstead) made the suggestion. He declared parliament must "stem the gush of financial life of this country" by grasping any opportunity to solve the problem. His proposal, he asserted, was merely temporary, and he expressed hope that the transportation commission would have some beneficial remedies to offer.

## Police Watching Border

To Prevent Unemployed In States From Entering Canada

Ottawa, Ont.—Immigration and customs officials of the Dominion Government with members of the Royal Canadian Mounted Police are closely co-operating to prevent the unemployed of the United States from entering Canada.

Provisions of the Immigration and Labor acts will be applied in a strict manner to job seekers who attempt illegal entry into Canada. Some months ago an order-in-council, especially dealing with contract labor, was passed. These provisions, which will likewise be rigidly enforced, are aimed to prevent the entry of people who come to this country under a contract of employment or to negotiate for employment.

## Perjury Charge Dismissed

Quebec, Que.—The charge of perjury preferred against Capt. J. E. Bernier, widely known Canadian explorer and navigator, following a complaint made by Raoul Harvey, a seaman, was dismissed by Magistrate Ferdinand Roy recently. Harvey claimed the captain perjured himself when called to testify before the Dominion wreck commissioner's inquiry into the sinking of the s.s. Guide, in 1926.

## Trade Treaty With Cuba

Ottawa, Ont.—The Canadian Government is considering entering into a reciprocal trade treaty with Cuba with a view to creating a market for Canadian potatoes. This information was contained in an answer of the secretary of state in the House of Commons to a question of Oscar Boninger (Liberal, Bellechasse). A request to institute the treaty was received from a group of farmers of New Brunswick.

## Ask Tax Removal

Ottawa, Ont.—A large delegation of ice cream manufacturers waited upon members of the government, with a request for removal of the six per cent. sales tax on their product, provided in the budget now before the House of Commons.

## Hidden Explosives

Moisture Saves Workmen From Death When Hammer Strikes Dynamite

Victoria, B.C.—Fifty sticks of dynamite, with a handful of detonators, have been taken from the middle of the new Mount Douglas road by Saanich workmen and destroyed.

Only the heavy downpour of rain which marked the week-end saved the men from being blown up when one of the workers drove his mattock through the sack of explosives.

The dynamite was buried six inches below the surface of the gravel pit at the crest of the hill. The condition of the sack indicated that the explosives had been hidden about eighteen months ago, at the time when Saanich was carrying out extensive clearing operations on the roadway.

## GIVE RESULTS OF RUST-RESISTANT WHEAT TESTS

Winnipeg, Man.—Varieties of rust-resistant wheat which have been tested so far for milling and baking qualities appear to be quite satisfactory in that respect, L. H. Newman, Dominion Cerealist, told members of the associate committee on field crop diseases of the National Research Council, at the second session here of their annual meeting.

The committee is considering the preparation of a statement following this meeting showing the results of tests of rust-resistant wheat developed by the various organizations co-operating in the effort to place such a wheat in farmers' hands. Thirteen varieties of this wheat used in the experiment described to the meeting by Dr. C. H. Goulden, of the Winnipeg rust laboratory, show good results in its yield per acre, and in the number of days it takes to mature.

Dr. F. J. Greaney, also of the laboratory, reported it had been proved sulphur dust will protect grain from the attacks of rust, although it will not help a plant which has already been infected. He said efficient methods of spreading the sulphur dust had been developed, but they might not come into general practical use here because of economic conditions.

The accurate identification of fungi is an important step in rust research, and a difficult one, Prof. A. H. Bailie, of the University of Manitoba, told the members. He suggested better library facilities here would greatly aid the work.

Dr. O. S. Aamodt, University of Alberta, outlined for the committee progress which has been made in testing certain varieties of drought-resisting wheat brought to this country from Russia in 1928. Emphasizing the importance of this branch of research in breeding, he urged further intensive study through practical field tests be conducted in the varieties which had already been brought down to the segregating generations, and said the cost of equipment for the work would not exceed \$500.

## Railway Line Flooded

Edmonton, Alberta.—Flood waters from the Athabasca River cover more than a mile and a half of track on the Northern Alberta Railways line to Waterways, on which service has been temporarily suspended.

## ANGLO FRENCH CONFERENCE AT 10 DOWNING STREET

M. Andre Tardieu (left), French Foreign Minister, and Premier Ramsay MacDonald, of Great Britain (right), are photographed in a happy mood as they met in the garden of the Prime Minister's residence at 10 Downing Street, London, England. In the background, between the two statesmen, can be seen Right Hon. Walter Runciman, one of the British delegates to the informal conference.

## SOVIET PLOT VICTIM

Charging that Soviet Russia is out to ruin him and to destroy public confidence in his enterprises, Sir Henry Deterding, British oil magnate, recently told how Soviet agents by a two-year campaign of lies have attempted to depreciate the value of stock exchange shares. At various times these agents circulated rumors that Sir Henry had absconded, that he was dead, and that he was bankrupt, in order to secure his stocks.

## Economic Conference

Parliament To Discuss Matters Pertaining To Important Event

Ottawa, Ont.—Parliament will probably have a discussion on the Imperial Economic Conference shortly. When the vote of \$250,000 to defray expenses of the Empire gathering comes before the Commons, Rt. Hon. R. B. Bennett is prepared to set aside a day for members who may wish to give their views, and may himself make a brief statement.

With definite assurances that all parts of the Empire will be represented by prominent delegates at the opening of the conference here on July 21, the "spade" work is being pushed forward. Committees, sub-committees and inter-departmental organizations are hard at work.

Under the supervision of the cabinet and a cabinet sub-committee, departmental committees are gathering essential information and making preparations.

The agenda itself has not been completed. When that stage has been reached, the question whether or not a completed agenda will be laid before the House will depend on what is thought desirable after consultation with all the governments concerned.

## Boost Gasoline Price

Toronto, Ont.—One-cent per gallon increase in the price of gasoline, effective throughout the greater part of the Dominion, April 21st, was announced here by the Imperial Oil Company. The increase, said by the company to be necessary to offset in part a jump in crude oil prices, affected Ontario, most of Quebec province and Manitoba, Saskatchewan, and Alberta.

## Delegates From Russia

Ottawa, Ont.—Extended an invitation to participate in the Fifth Pacific Science Congress, scheduled to meet in Canada in 1933, Russia has accepted and the Union of Soviet Socialist Republics will be represented by at least ten official delegates. The congress sessions will be held in Vancouver and Victoria, B.C.

## Cattle Export Problems

Will Probably Come Before Imperial Economic Conference

Ottawa, Ont.—Senator Arthur Meighen, Government leader in the Upper House, announced that problems facing cattle exporters would be brought to the attention of the chairman of the committee arranging for the Imperial Economic Conference which meets in Ottawa in July.

Canadian cattle encountered many restrictions when entering the British market, said Senator D. E. Riley, introducing the subject. Nothing would help Canadian agriculture more than the improving of the live cattle trade.

Canadian cattle encountered less favorable conditions in the British market than Irish cattle, he said. A total of 26,000 cattle crossed the ocean last year but the trade could be developed to a greater extent than this if restrictions were modified. The best opportunity to review the entire trade would be at the conference table.

Organization of the conference agenda was under the supervision of the cabinet said Senator Meighen. Memoranda were being prepared on tariffs, exchange, currency and other topics and he would undertake to bring to the attention of the government the important subject of the cattle trade.

## U.S. ATTACKS ON WHEAT POOL ARE REFUTED

Ottawa, Ont.—That the co-operative wheat pool movement in Canada has been selected by propagandists in the United States and improperly cited by them in their fight against the co-operative movement in that country is a matter of regret, and ought not to be allowed to pass without answer. This is the opinion of Hon. H. H. Stevens, Minister of Trade and Commerce, expressed in a statement made public here.

Referring to articles published in Chicago and elsewhere in the United States to the effect that Canadian wheat pools had accomplished the "ruin of Canadian wheat farmers" who were threatening to "strike against taxation" and talking "secession," Mr. Stevens declared that Canadian wheat pool members still had faith in their co-operative organization and were shipping a large portion of their grain through pool elevators. Furthermore, no losses have been sustained by farmer members of the wheat pools other than that they were disappointed at not obtaining further sums for their 1929 wheat sold through the pools owing to the sudden drop in prices.

"The profits of farmer-owned handling facilities have always been very large, and no doubt will rapidly repay the advances (made by the prairie governments) without any loss to the governments concerned," said the minister.

"The situation in respect to the wheat pools in the three prairie provinces," said Mr. Stevens, "is substantially as follows:

"Three pools, previously operating under a contract with their grower members, have released those members from the operation of that contract. The holdings of the wheat pools as pools are gradually being liquidated by the pools themselves as market opportunities afforded, being only assisted by the Dominion Government in their financing. Pools, however, are operating their subsidiary elevator companies independently which are still solvent and are in no danger of liquidation. Certain losses amounting to some \$22,000,000 were sustained by the pool on the 1929 crop, the advance payment to their farmer members proving excessive in view of the slump in the market. These losses were guaranteed by the various provincial governments, according to the provincial interest, in approximately the following proportions: Alberta, \$8,500,000; Saskatchewan, \$13,000,000; Manitoba, \$2,500,000. The provincial governments have made good these amounts to the banks and have negotiated agreements with the pools for the repayment, which will be done out of the earnings of the subsidiary elevator companies and other assets of the pools. To secure themselves, the various provincial governments have taken a first charge over the assets of the pools, namely elevators, terminals, etc., of an approximate value of some \$30,000,000. No losses were sustained by the farmer members other than the disappointment of not obtaining further sums for their wheat sold through the pools. This, of course, is a contractual liability.

## RAISING TARIFF WALL AROUND THE BRITISH ISLES

London, England.—The tariff wall around Great Britain—the leading exponent of free trade, was doubled in height today.

The imports duty advisory committee recommended that a total duty of 20 per cent. be imposed on nearly every type of manufactured goods imported into the nation. The new rates became effective after midnight, April 25. The general tariff law now in effect assesses imports 10 per cent.

The advisory committee authorized under the general tariff act to recommend changes which are put into effect by order of the treasury, described the new tariff policy thus: "For most manufactured goods, an additional duty of 10 per cent. making 20 per cent. in all. On a limited number of others, for which a lower rate seems appropriate, total duty will be 15 per cent. and for certain articles of luxury or semi-luxury character, total duties will be 25 or 30 per cent."

When the new rates become effective, the orders issued under the Abnormal Importations Act, which imposed an ad valorem duty of 50 per cent. on certain classes of goods, will be revoked.

The advisory committee treated iron and steel in a separate category, putting a total duty of 33½ per cent. on semi-finished steel for a period of three months.

Increased duties in imports to Great Britain, recommended by the tariff advisory committee, will not apply to goods from Canada or other parts of the British Commonwealth, owing to the government's decision that empire goods shall not be subject to duty at least until after the Ottawa Imperial Economic Conference next July.

## B.C. Placer Mining

Would Put Unemployed To Work Panning Gold

Victoria, B.C.—Plans for putting unemployed men to work washing gold in the streams of British Columbia are being shaped at conferences here between the government and officials of the mines department.

Under a scheme discussed in a general way at the recent unemployment conference at Ottawa, it is proposed that unemployed men, who desire to do so, shall be given grubstakes which will enable them to carry on placer operations. They would repay the cost of their maintenance and keep any amounts which they made over and above that.

Mines department officials believe that in many parts of the province men working in small numbers could make enough to support themselves, and many, with luck, could make reasonable wages.

## New Zealand Will Censor All Messages

To Prevent Alarmist Reports Being Cabled Overseas

Wellington, N.Z.—A censorship of messages sent abroad will be instituted by the government in order to prevent alarmist reports concerning possible recurrence of disorders in Auckland or elsewhere being cabled overseas. The government has decided to enforce the provisions of the postal regulation which gives this power.

Meanwhile both houses of parliament have passed the government's bill seeking emergency powers to deal with disturbances such as those at Auckland when mobs of unemployed got out of hand and did considerable property damage and looting.

## Engineer Dies At Post

London, Ont.—While his 60-mile-an-hour International Limited passenger train sped along between Kenwood and Strathroy on the Sarnia to London non-stop lap, Engineer Alexander Bond of Sarnia died of heart failure. Fireman S. Falconer of Sarnia brought the train into London 50 minutes late.

## To Honor Scientist

Montreal, Que.—Dr. John S. Plaskett, director of the Dominion Astrophysical Observatory at Victoria, B.C. will receive the degree of Doctor of Laws at the spring convocation of McGill University, May 26.

## Drug Addicts In Canada

Ottawa, Ont.—Every effort had been made in Canada to restrict the drug traffic yet it was estimated that there were 8,000 addicts in this country. Rt. Hon. Arthur Meighen told the Senate.

## Opportunity For Canada

To Supply British Market Regularly With Cured Bacon

In view of the Mother Country's trade deficit in relation to Denmark it is competent for Canadians to urge upon the Conference the facts that Canada is the only overseas Empire country in a position to supply cured bacon; that we have an adequate surplus of grain for hog feed; that we now have a satisfactory foundation stock for bacon-type hogs; and that being comparatively close to the British market there is assurance of regularity of supply.

As Canadian producers hear that British interests are exerting themselves to build up a native hog industry, they need not expect to acquire the whole trade once regarded as the prerogative of Denmark. But to obtain a substantial part of the \$200,000,000 excess of imports from Denmark over exports to that country, would materially aid the Canadian industry, and add to the general stability and prosperity of the Dominion. Canadians will have a right to be disappointed if the humble though vitally important domestic hog does not take a prominent place in the Conference deliberations.

### Supports Cattle Move

Minister Of Agriculture In Favor Of Diversified Farming

Voicing his approval of plans to place livestock on every prairie farmstead in Manitoba, Saskatchewan and Alberta, a letter has been received from Hon. Robert Weir, Dominion Minister of Agriculture, at the head office of the Dominion Agricultural Credit Co., Ltd., in Regina.

In this communication the federal minister says, "I have always felt that every farm in the west should have enough livestock, cattle, pigs and poultry, to be self-sustaining."

"It is with this end in view that we have enunciated a policy for the distribution of pure strains of grass seeds to farmers whom we feel will grow it for the reproduction of seed so that the price of this seed to the western farmer may be put within every farmer's reach," continues the letter.

"We are also encouraging the growth of shelter belts to enclose say 10 to 20 acres, as a protection for livestock. A thick shelter belt around a small trench or reservoir for water supply should make it possible for any farmer to handle stock in this way."

Applications for obtaining foundation cattle and sheep on credit are now reaching the office of the Dominion Agricultural Credit Co., Ltd., from all parts of Manitoba, Alberta and Saskatchewan.

### Coarse Grain Shipment

Full Cargo Of Alberta Oats and Barley Leaves Vancouver For England

What is believed to be the first full cargo of coarse grains to leave Vancouver for foreign markets is on board S.S. "Langlegore," for Antwerp and Rotterdam.

For some time there has been an increasing demand in Europe for the hearty oats and barley of Alberta, until now it is to a point where a full cargo is being loaded. Smaller parcels have been frequently taken on other grain ships for many months past.

S.S. "Langlegore" has loaded 4,330 tons of barley and 2,570 tons of oats. The rate is slightly higher on these coarse grains, because they are more bulky than wheat.

### Earn Long Service Medals

C. Jackman, aged 88; his son, A. Jackman, aged 83; and George Lynes, aged 68, who have between them completed 173 years' service on the Farm of H. Stilgoe, at Allerbury, England, have been presented long-service medals by the Royal Agricultural Society.

The population of Scotland is 4,812,554.

"Mistress is not receiving today." "That doesn't matter as long as she's giving."—Moustique, Charleol.

W. N. U. 1939

## NOTES ON GARDENING

PERENNIAL CLIMBERS ADD MUCH TO THE ATTRACTIVENESS OF THE HOME

Nothing adds quite as much to the attractiveness of any verandah or wall as a climbing plant. This acts not only as a screen, giving privacy, but also provides the desired shade and a permanent appearance to the residence by breaking harsh lines and taking away barrenness from featureless walls. In this country more attention might well be paid to climbers. Moreover, if we are only renting our home we should not run away with the idea that climbers are not for use because there is a very generous list of annual climbing plants, as well as those of a permanent nature. Of course, where one is the owner, a screen that will last indefinitely is advised. In this connection the Dutchman's Pipe, a very broad-leaved plant, is recommended, or we may use the Virginia Creeper, rapid growing and now secured in a variety which is self-clinging on rough surfaces. In the warmer sections of the Dominion, Boston Ivy will grow. In this connection also roses of the rambling type are very satisfactory, providing screens from May until October, and a profusion of flowers during the early part of the season as well. The semi-climbing Paul's Scarlet Rose is a beautiful type with large flowers on long stems. Trellis work is usually used to support all climbers and particularly the roses, although many of the annuals, as well as Virginia Creeper and Dutchman's Pipe, may be trained on wires or strings. Ivy does best on the wall. Of annual climbers, we have the rapid growing Hops, Scarlet Runner and Hyacinth Bean, Morning Glories and Wild Cucumber. The latter is a very rank growing plant and is inclined to spread indiscriminately.

Until the perennials have occupied the full space in the bed the vacant spaces may be filled in with annuals such as Sweet Alyssum, in the front, and Gypsophylla Elegans, Portulaca, California and Shirley Poppies. Annual seedlings such as Petunias, Aspers, Clarkias, Zinnias and Verbenas may be used for this purpose about the end of May, and Gladioli and Tulips also work in well. "For best results in keeping down weeds in perennial or shrubby borders," writes Professor A. Tomlinson of the Ontario Agricultural College, "it is necessary to use a hoe, preferably a Dutch or flat type, quite frequently during the growing season. The ordinary hoe is liable to go too deep and usually much more time is required."

A light, deep, sandy loam containing plenty of humus is the ideal garden soil. If ours does not come up to these specifications it can easily be corrected. If too light, dig in straw manure or if the plot is very small add a few loads of clay. Straw manure is also advised for improving heavy soil, as well as sand and even a light application of coal from year to year, the practice being known as rotation. One vegetable grown in exactly the same location each season will soon exhaust all the particular nourishment required, and may also fill the soil with disease. This is particularly true also of some flowers, especially the gladioli. Then there are leguminous crops such as peas and beans which add fertilizer to the soil and should be moved around so that the whole garden will benefit. These will offset the inroads made by such heavy feeders as corn, beets and carrots.

It is advisable to move your vegetables around the garden from year to year, the practice being known as rotation.

## WILL PRINCE ARTHUR RULE JUGO-SLAVIA

Rumor persists that King Alexander of Jugoslavia is weary of sitting on a throne, a target for the criticism of his discontented subjects. Since he suspended the constitution in 1929 and proclaimed himself virtual dictator, King Alexander's life has been anything but a bed of roses. According to reports which have trickled through responsible political channels, a deputation of Jugoslav parliamentarians is even now in London to offer the throne to Prince Arthur of Connaught, son of the Duke of Connaught, and cousin of King George. Prince Arthur is forty-nine. He served with distinction in the World War as an officer in the Scots Greys, and after the war was sent to South Africa as Governor-General of the Union. If he should accept the crown of Jugoslavia, his wife, Princess Arthur, would automatically become Queen. But before the prince can make any decision, he must have the consent of King George.

### Meaning Of Word "Grit"

Depends On Point Of View When Used Practically

It is interesting to speculate upon the origin of words and terms. Take, for instance, the political use of the word "grit." Why should a Liberal be called a Grit? There are two schools of thought upon the subject: one holds that the use of the word proceeds directly from its dictionary meaning, to wit, according to Webster:

Grit: n. (ME. greet, greet, sand, gravel. AS. greet, sand, dirt, dust).

Grit: v.t. to grind, to grate, as to grit the teeth, to irritate.

In the opinion of disciples of this preponderantly Conservative school, Liberalism is as sand in the bearing of the wheels of progress and dust in the eyes of the people.

The other body of opinion rests its case upon Brewer's Dictionary of Phrase and Fable, which defines "clear grit" as originally a piece of American slang meaning the right spirit, real pluck, the genuine article.—Hamilton Spectator.

### A Substantial Fare

A taxi driver had a very stout fare and experienced some difficulty in getting her in and out of the cab.

"I'm afraid I'm a bother to you," she said as he was helping her out.

"Not a bit," answered the man, meaning to be gallant. "I like a fare who steadies the cab."

A new kind of white paper towel resists breakage when damp, with the ordinary amount of twisting and rubbing.

### Smart To Be Broke

Many Well-To-Do People Are Pleaded With Poverty

According to R. H. Macy & Co., of New York, it has always been smart to be thrifty, but now apparently we have reached that stage where it is smarter to be broke. Everyone is pleading poverty—often unnecessarily. There is the story of the New York matron with an income she could not spend if she tried, who is said to have explained to a friend that she was sorry to have dismissed her chauffeur.

The step had to be taken, however, despite the fact that he was a nice man and had a wife and three children, because it was imperative that everyone economize at a time like this and she wished to set an example!

It is similar psychology which is preventing many men from buying a new car or a new yacht, or having that addition built. They either believe that they are furthering the good of mankind by keeping their excess dollars, or they think that their neighbors will consider them "bloated plutocrats" unless they too do without something which they can very well afford. Anyone buying anything new these days is to be congratulated, not condemned.

Alligator eggs have no shell, but have a transparent, parchment-like cover which yields to pressure of a finger, and returns to shape when released.

"Strange Foods Novelists Eat" is the title of a magazine article. But think of some of the strange things they ask their readers to swallow.

## Great American Myth

The Current Depression Has Exploded The Self-Sufficiency Theory

From the point of view of human reactions, the current depression signifies a breakdown of the most respected cliché of American thought. The average American is imbued with an uncritical belief in the eternal rightness of all things American. No American army has ever been bested in any important encounter. Big Business, with all that the phrase implies, has always been considered as right as God and the Constitution. American independence, self-sufficiency, and isolation have never been questioned, while American speed, sports, technical developments, advertisements, and our scale of living in general are the standards of the world.

The depression has cast grave doubts on the validity of many of these beliefs, and proved others utterly incredible and unreliable. For the first time in history, healthy Americans of native stock are starving in the midst of plenty. The vaunted "splendid isolation" and the time-honored "detachment of American diplomacy have become untenable principles. Big Business, the last of the American idols to expose its clay feet, has been unmasked as a fraud and a delusion. Men who have never questioned the belief that hard work, honesty, and the investment of one's savings in "sound" stocks and bonds would eventually guarantee a comfortable life, are wearily rounding the streets in search of a job. Others who have retained their jobs have developed a panicky slave-morality toward their employers. And to cap the climax, the luxuries and comforts of American living, which have become an almost universal tradition, have completely collapsed. The never-before-questioned rightness of unresisted and unregulated individualism has proved itself a fatal booby-trap. The great American myth has been exploded.—W. B. Wolfe, M.D., in the Forum, N.Y.

### Apple Should Be

Addressed As "She"

Mrs. Stanley Baldwin Gives Four Good Reasons

Mrs. Stanley Baldwin, wife of the Conservative leader, thinks the apple property should be addressed as "she," like a ship.

At a ceremony in London, marking the opening of New Zealand's apple season, she gave four reasons for her belief:

"Because the apple was the most desired fruit in the Garden of Eden. Because it was the medium of showing up Adam as 'the first cad in the world.'"

"Because it was the orchard's 'maid-of-all-work.'"

"Because apple attracted the men more than any other dish. 'Watch any dinner which dessert is served,' Mrs. Baldwin added. 'The men will choose apples and the women will choose pears.'"

### Rock Garden Is Popular

Depends More On Individual Effort Than Any Other Type Of Gardening

"What is it that makes rock gardens so attractive?" asks Dr. W. T. Macoun, Dominion Horticulturist. And his answer to this question is: "One important reason is that the greatest amount of bloom is early in the spring when enthusiasm for gardening is at its highest and when flowers in the garden are most appreciated. Another attraction of the rock garden is that more depends on individual effort than, perhaps, with any other type of gardening. The rocks may be arranged so that they give a very unnatural effect, not to be desired, or they may be placed in such a way that the setting for the plants seems very natural."

### Debts For Machinery

Saskatchewan Farmers' Indebtedness To Implement Companies Only Quarter That Of 1915

The indebtedness of Saskatchewan's farmers to implement companies is only a quarter as much as it was in 1915. This fact was brought out when representatives of implement companies gave evidence before the Saskatchewan legislative committee on debt adjustment. Farmers of the province owe \$20,000,000 to machinery companies, 85 per cent. of which is past due, but the average indebtedness of farmers throughout the whole province is only \$166 per farm. Farmer indebtedness for implements now is 50 per cent. lower than it was in 1921, and 100 per cent. lower than it was in 1914.

It is estimated that corrosion of metals in the United States represents a loss of a billion dollars a year.

## The Years Of Dependence

Average Boy's Life Half Gone Before He Is Self-Supporting

One of the tendencies of modern civilization is a steady increase of the age of helplessness among young men. A few generations ago, a boy was self-supporting in his teens. Twenty-one was his voting age, predicated on the belief that he was then a mature man.

The average boy graduates from high school at eighteen. A four-year college course brings him to the age of twenty-two, if he has no set-backs. He is then ready for his four years in medical, law or engineering school, at the end of which time he is twenty-six, but not yet ready to practice his profession until after a couple of years as an intern, two years in a lawyer's office or the same time as an assistant to an engineer. Twenty-eight years of age and still dependent on his parents for his daily bread!

Is this wise? The years of dependence have steadily increased until a boy's life is almost half gone before he is ready to live. Half his days are wasted and he is yet of no service to humanity or himself. Half dead and still not self-supporting!

Perhaps it is lucky that half our boys have to go to work after high school, so that they may get in a business position to give employment to these college graduates. They have from four to eight years business experience before the over-educated boy gets busy.

College and technical training are a necessity for a professional career. When a boy must work part of his way to get such an education, he is appreciative. The work he does gives him business experience which he needs to turn his education to practical use. Many boys who are dependent on the bounty of their parents until they are thirty years of age, have little chance of success in professions already overcrowded.

At the present rate of increase in the age of dependence, it will not be long until men will be forty years of age before he begins to live! What age did Dr. Osler of Baltimore suggest as the proper time to chloroform a man because his usefulness to the world was at an end?

Thinking educators admit that half the boys who go through college have wasted the four years and all the dollars it cost their parents. These boys would have better gone into business, trade or the arts when they left high school than to have devoted four years to baseball, basketball and football.

All boys are not adapted to a college education, and more than all boys are adapted to medicine, law or electrical engineering. Many of them are victims of parents trying to live over their own lives in those of their children, attempting to make of their boys that which they would have liked to have been, regardless of the boy's adaptability to that particular work.

When a boy is adapted to higher education, every opportunity should be given him to acquire it, but there is equal work for educators and parents to discourage long college courses and the time of helplessness in the lives of young men who will make no use of the education when acquired.—Kiwans Magazine.

### Alberta Sugar Beets

This year's sugar beet sign-up at Lethbridge, Alberta, is likely to reach 13,200 acres, more than 1,000 acres over the area planted to beets a year ago. This means that additional growers will be allowed to sign contracts for beets this season. The new contract is out and no difficulty is expected in securing plenty of acreage as irrigation farmers everywhere are anxious and prepared to raise sugar beets.

Teacher: "Why is your handwriting so bad, Willie?" Willie: "Well, if it was better you wouldn't like my spelling."

Rio de Janeiro has opened its first automatic restaurant.

"Conductor, will you pull the emergency cord?"

"I can't. My wife is using it for a clothes line!"—Nagels Lustige Welt, Berlin.

## Too Sick for School

Mrs. Dow Says Dr. Williams' Pink Pills Restored Daughter to Health.

"My daughter was run down in health, took weak spells and could not go to school," writes Mrs. As. Dow, Port Daniel West, Quebec.

"While visiting her aunt, a friend told her about a little girl in similar condition who had been completely restored to health by Dr. Williams' Pink Pills. My daughter has since been taking the Pills, and they have certainly made her stronger. She has lost that tired, sluggish feeling and has never missed one day's school since September. The Pills also gave her a good appetite; her nerves are better and she has more pep. I recommend Dr. Williams' Pink Pills to mothers of daughters with similar troubles."

Don't let anemia ruin your growing daughter of health and vigor. Give her Dr. Williams' Pink Pills. They are no temporary relief. They banish the condition by creating new blood which imparts health, vigor and vitality. Equally good for all run down or nervous conditions. At your druggist's, 50c. 274

## THE HOUSE OF DREAMS-COME-TRUE

— BY —  
MARGARET FEDLER  
Author of  
"The Splendid Thing," "The Hermit of Far East,"  
Hodder & Stoughton, Ltd., London.

## CHAPTER XIX.—Continued.

"The skunk!" muttered Nick wrathfully.

"What's that?"

Claire drew suddenly closer to him, her face blanching. A sound—the light crunching of gravel beneath a footstep—had come to her strained ears.

"Nick! Did you hear?" she breathed.

A look of keen anxiety spread his face. For himself, he did not care; Adrian Latimer could not hurt him. But Claire—his "golden narcissus"—what might he not inflict on her as punishment if he discovered them together?

The next moment it was all he could do to repress a shout of relief. The steps had quickened, rounded the corner of the alley, and revealed—Jean.

"We're mighty glad to see you," remarked Nick, as she joined them.

"We thought you were—the devil himself—with a grin."

"Oh, he's safe for half an hour yet," Jean reassured them. "I asked Tucker—the Latimer's butler, who worshipped the ground Claire walked on—and his solicitor is still with him. Otherwise I wouldn't have risked looking for you"—smiling. "I knew Nick was over here, and Sir Adrian might have followed."

"You're sure he hasn't?" asked Claire nervously. "He is so cunning—so stealthy."

"Even if he had, you're doing nothing wrong," maintained Jean stoutly.

"Everything I do is wrong—in his eyes," returned Claire bitterly.

"That's what makes the misery of it. If I were really wicked, really unfaithful, I should feel I deserved anything I got. But it's enough if I'm just happy for a few minutes with a friend for him to want to punish me, to—suspect me of any evil. Sometimes I feel as if I couldn't bear it any longer!"

She flung out her arms in a piteous gesture of abandonment. There was something infinitely touching and forlorn about her as she stood there, as though appealing against the hideous injustice of it all, and with a little cry Jean caught her outstretched hands and drew her into her embrace, folding her closely in her warm young arms.

Nick had turned aside abruptly, his face rather white, his mouth working. His powerlessness to help the woman he loved had maddened him.

Meanwhile Jean was crooning little, inarticulate, caressing sounds above Claire's bowed head, until at last the latter raised a rather white face from her shoulder and smiled the small, plucky smile with which she usually managed to confront outrageous fortune.

"Thank you so much," she said with a glint of humour in her tones.

"You've been dears, both of you. It's awfully nice to—to let go, sometimes. But I'm quite all right again, now."

"You'd better go," she whispered uneasily. "We shouldn't be able to talk any more now that he knows you are here. He'll be hovering round—somewhere."

Jean nodded.

"Yes, we'd better be going. Come along, Nick. And let us know, Claire?"

"Then, if you are," replied Jean cheerfully, "perhaps you can bear up against the shock of too much joy. We want you to have 'a day out'."

"A day out?" repeated Claire. "What do you mean?"

"I mean we're organizing a picnic to Dartmoor, and we want to fix it so that you can come too. Didn't you tell me that Sir Adrian was going to be away one day this week?—forgetting, and not returning till the next day?"

Claire nodded, her eyes dancing with excitement.

"Yes—oh, yes! He has to go up to London on business."

"Then that's the day we'll choose. Heaven send it be fine!"—pleased.

"Oh, how I'd love it!" exclaimed Claire. "I haven't been on the Moor for such a long time."

"And I've never been there at all," supplemented Jean.

"Nick! Nick!" Claire turned to him excitedly. "Did you know of this plan? And why didn't you tell me about it before?"

He looked at her, a slow smile curving his lips.

"Why, I never thought of it," he admitted. "You see—explanatorily—when I'm with you, I can't think of anything else."

"Nick, I won't have you making barfaced love to a married woman under my very nose," protested Jean equably. And the shadow of tragedy that had hovered above them a few minutes earlier broke into a spray of cheery fun and banter.

"You seem very gay today."

The cold, sneering tones fell suddenly across the gay exchange of jokes and laughter that ensued, and the trio looked up to see the tall, lean, black-clad figure of Sir Adrian standing at the end of the path, awaiting their approach.

To Jean, as to Claire, occurred the analogy of a malevolent spider on the watch. Even the man's physical appearance seemed in some way to convey an unpleasant suggestion of resemblance—his long, thin, sharply-jointed arms and legs, his putty-coloured face, a livid mask lit only by a pair of snapping, venomous black eyes, half hidden between pouted lips that were hardly more than hanging folds of wrinkled skin, his long, lipped, predatory mouth with its slow, malicious smile. Jean repressed a little shudder of disgust as she responded to his sneering comment.

"We're—quite gay, Sir Adrian. It's a fine day, for one thing, and the sun's shining, and we're young. What more do we want?"

"What more, indeed? Except"—bowing mockingly—"the beauty with which a good Providence has already endowed you. You are a lucky woman, Miss Peterson; your cup is full. My wife is not, perhaps—regarding her appearance—"quite so beneficently covered by Providence, so it is named, and as the black, pin-point eyes beneath the flabby lids detected the slight stiffening of Claire's slender figure, his long, thin lips widened into a sardonic smile.

"Yes, to the brim," he repeated with satisfaction. "That's a husband's duty, isn't it, Mr. Brennan?"—addressing Nick with startling suddenness.

"You should know better than I, Sir Adrian," retorted Nick, "seeing that you have experience of matrimony, while I have none."

"But you have hopes—aspirations, isn't it?" pursued Latimer suavely. There was an undercurrent of disagreeable suggestion in his tones.

Nick was acutely conscious that his keenest aspiration at the moment was to knock the creature down and jump on him.

"We must find you a wife, eh, Claire? Eh, Miss Peterson?" continued Sir Adrian, rubbing the palm of one bony hand slowly up and down over the back of the other. "I'm sure, Claire, you would like to see so—intimate—a friend as M. Brennan happily married, wouldn't you?"

"I should like to see him happy," answered Claire with tight lips.

"Just so—just so," agreed her husband in a queer cackling tone as though inwardly amused. "Well, get him a wife, my dear. You are such friends that you should know precisely the type of woman which appeals to him."

He nodded and turned to go, gliding away with an odd shuffling gait, and muttering to himself as he went: "Precisely the type—precisely."

As he disappeared from view down one of the branching paths of the shrubbery, an odious little laugh, half chuckle, half snigger, came to the ears of the three listeners.

Claire's face set itself in lines that made her look years older than her age.

"You'd better go," she whispered uneasily. "We shouldn't be able to talk any more now that he knows you are here. He'll be hovering round—somewhere."

Jean nodded.

"Yes, we'd better be going. Come along, Nick. And let us know, Claire?"

as soon as you have found out for certain what day he goes away. You can telephone down to us, can't you?"

"Yes, I'll ring up when he's out of the house some time," she answered. "Or send a message. Anyway, I'll manage to let you know somehow. Oh!"—stretching out her arms ecstatically—"imagine a day of utter freedom! A whole day!"

(To Be Continued.)

## Delay Branch Line Construction

Parliament To Be Asked To Extend the Time To August 31, 1934

Parliament will be asked to extend the time from August 31, 1932, to August 31, 1934, for construction and completion of a number of proposed Canadian National Railway branch lines. R. J. Macdonald, Minister of Railways and Canals, will introduce a bill in the House of Commons to this effect.

The list of branch lines to be covered by the measure is:

From near Unity to near the provincial boundary in townships 36 and 37, in Saskatchewan.

From Nethpatt to a point on the Canadian Pacific Railway near Swift Current, in Saskatchewan.

From near Central Butte or Mavor to townships 18 or 19, ranges 10, 11 or 12, west of the third meridian, in Saskatchewan.

From Ridgedale, Saskatchewan, 30 miles toward The Pas, in Manitoba.

From St. Walburg, Saskatchewan, to Bonnyville, in Alberta.

From near Bulwark to townships 38 or 39, range eight west of the 4th meridian, in Alberta.

From the Dundas subdivision, near Brantford, to a point on the Dunnville subdivision, near Gainsville, in Ontario.

From Hemarruka to Sempa, in Alberta.

From New Westminster to a point on Lulu Island in British Columbia with branches therefrom.

From a point on the Sudbury branch to a point in the Township of Fairbank, in Ontario.

From Sunbury to Gaysborough, in Nova Scotia.

From near Swift Creek to a point near Tete Jaune, in British Columbia.

## Allies Of Doctors

High Temperatures From Fever Protect Body Against Disease

Fever, once viewed with alarm, now are listed among the physician's allies by Dr. Robert A. Reimann, of the University of Minnesota.

Dr. Reimann told delegates to the sixteenth annual meeting of the American College of Physicians the change from the nineteenth century to the twentieth century attitude toward fever followed much careful experimentation.

High body temperatures were revealed by these experiments, he explained, as a protection against attacks by disease organisms.

The reason he gave in substance: Fever changes the chemistry of the plasma, or body fluids, in blood and tissue. The change increases the viscosity of these fluids, makes them more thick and sticky and increases their power to gather the disease organisms in motionless clumps. This bactericidal distribution is restricted.

The Friend Of All Sufferers.—Dr. Thomas' Electric Oil is a valuable remedy to all those who suffer pain. It holds out hope to everyone and realizes it by stilling suffering everywhere. It is a liniment that has the blessing of relief a continent that is on sale everywhere and can be found wherever engaged for.

## Milk Does It

Children Of Public Schools In Britain Are Healthier Than Those Of 20 Years Ago

Children are leaving British schools today healthier and fitter than the children of 20 years ago, Sir Donald MacLean, president of the Board of Education, told the House of Commons.

On the other hand, said Sir Donald, employers were complaining of the physique of many young men.

Nearly 1,000,000 children in the elementary schools are receiving at least one glass of milk a day through the school.

Japan expects to develop an annual production of 1,000,000 tons of steel in Manchuria.

PURELY VEGETABLE

No better corrective exists today

for BAD COMPLEXION AND ACID STOMACH

Sold everywhere in 25c and 75c red boxes.

CARTER'S PILLS

You can cook 3 vegetables AT ONCE

in the same saucepan by using CANAPAR

Do each vegetable up in its own bag of Canapar Cookery Parchment. There won't be any odor, not even from cauliflower. All the food and flavor will be retained. And you use only one burner turned low for cooking. The flavors will not mix!

Do the same with boiled or steamed fish. You'll be delighted with the results. No fatty odor in the kitchen. No soap or ketchup to clean up. When roasting meat, line your pan with Canapar. Fat and juices won't burn. No more scraping or scouring of the pan afterwards.

You can use Canapar repeatedly by simply rinsing it off and hanging it up to dry. It doesn't absorb odors. Makes a perfect dish cloth. Silky, strong, and doesn't spread lint. It's the only material in the famous PARASANI Heavy Waxed Paper in the Green Box.

Special Offer  
Most grocers, druggists and department stores have Canapar on sale, but if you haven't, send this coupon direct to the makers and we'll give you a new and unique booklet containing 100 recipes for "Leftovers" and your 100 recipes for "Leftovers" as a bonus for your trouble.

Applied Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 5c for which please send me one full size package of Canapar Cookery Parchment and your 100 recipes for "Leftovers."

## Canada To Be Envied

Much Better Off In Every Way Than United States

The city of Detroit has reached the same position as Chicago, Philadelphia and New York in finding itself unable to obtain enough money to pay municipal employees and carry on public services.

This is but one indication of the rapid descent of the United States from a position of unparalleled prosperity to unprecedented economic depression.

No such condition prevails in any of the large Canadian cities, yet New York bankers insist on holding the Canadian dollar at a severe discount.

There is proportionately less gold in Canada than there is in the U.S., but it is a fact that there is also proportionately much less unemployment.

Approximately one-sixtieth of the population in Toronto must receive its food at present by means of a House of Industry line-up. But that is far from being as bad as the situation in a Chicago suburb where daily long lines form up at a city dump in search of food.

## Discover Small Fortune

B.C. Family On Relief Learn Of Bank Balance Long Forgotten

Members of a local family who have been very hard-pressed financially, and dependent on unemployment relief, found an old bank book in a garret trunk. They were advised by a friend to forward it to the bank on the chance that there might be a little balance.

Recently they were advised by the Bank of Commerce branch at Nanaimo that there was \$1,290 standing to the credit of one of the older members of the family who had forgotten about the account.

## Britain's Income Tax

One of the amazing features of the British statement is that which discloses the sum which Britons paid in income tax. It amounts to well over \$1,000,000,000. One billion dollars for forty million people! Canada's taxes are high. But last year the total of taxation taken from the British people exceeded \$3,500,000,000.

A pliable rubberized material, resembling leather but not greatly affected by moisture, has entered the field as a competitor of leather.

American internal combustion engines are being used on farms in Latvia.

Be natural, borrowed garments seldom fit well.

## Non-Stop Flight Across Canada

Vancouver Sun To Sponsor Flight From Montreal To Vancouver

The Vancouver Sun has announced that it is sponsoring a projected non-stop flight across Canada from Montreal to Vancouver on June 21 next by two Vancouver aviators, R. E. Storey and B. R. Ronald. Refueling contacts are planned at Winnipeg and Calgary.

If successful the flight would be the first non-stop across Canada and the first attempt at refueling in the air for a long-distance hop in the Dominion.

Storey and Ronald plan to leave Vancouver early in May and fly to Montreal by easy stages.

They expect to leave Montreal at 8 o'clock in the morning of June 21, taking advantage of the long daylight hours, to make the flight from dawn to dusk. Flying westward with the sun they hope to make the distance in 21 hours and land here around 6 o'clock in the evening, Pacific Standard Time.

An additional advantage in flying westward is in avoiding the necessity of taking off at sea level with a heavy load of gasoline to make the long climb over the Rockies.

The air-line distance, from Montreal to Vancouver is 2,300 miles. The first stage to Winnipeg is 1,100 miles, where the first refueling would be made around 11 a.m. The next stage, Winnipeg to Calgary, should be completed late in the afternoon, with a final refueling for the hop over the Rockies.

The stated purpose of the flight is "to demonstrate the practicability of a 24-hour mail service across the Dominion."

The plans to be used is a taper-wing Veecon, three-place bi-plane, powered with a 220 horse-power Wright Whirlwind nine-cylinder radial engine with a cruising speed of 125 miles per hour. Extra gasoline tanks are being added to the plane. It will be named "The Vancouver Sun."

## THE RHYMING OPTIMIST

By Aline Michaels

MY THOUGHT OF YOU

There is no need to kneel  
And make abject appeal,  
To voice the urge I feel.

No need is there to praise  
The beauty of your ways,  
The triumph of your days.

You are so good, so true,  
How can I ask for you?  
God guide in all you do?

Your feet have been so sure,  
Your heart has been so pure,  
So valiant, to endure.

You need no fond desire,  
No love's bright beacon fire,  
To guard you from life's mire.

Your spirit is so fair,  
So wise, past all compare,  
My thought of you is prayer!

By order of Mussolini no one employed by the state will work on Sunday.

Try COFFEE... this Way!

ONCE YOU start having  
Borden's St. Charles Milk  
in your coffee, you will  
never again be without  
it in the house. It blends  
smoothly, turning the coffee  
to a rich golden brown, and  
has a rich luscious taste  
which comes back for more.

Borden's ST. CHARLES MILK  
UNSWEETENED EVAPORATED

Little Helps For This Week

"For none of us liveth to himself."  
—Romans xiv. 7.

Nor knowest thou what argument  
Thy life to thy neighbour's creed has  
lent.

—Ralph Waldo Emerson.

There is no sort of wrong deed  
of which a man can bear the punishment  
alone; you can't isolate your-  
self, and say that the evil which is in  
you shall not spread. Men's lives are  
as thoroughly blended with each  
other as the air they breathe; evil  
spreads as necessarily as disease.

Every sin causes suffering to others  
besides those who commit it.

—George Eliot.

National Marketing Board

Matter Is Under Consideration By Department Of Agriculture

A national marketing board is being considered by the Department of Agriculture to stimulate the prices of agricultural produce and increase exports to Great Britain.

The proposal is the outcome of discussions between the Dominion and Ontario governments, the National Dairy Council and the bacon and free trade. Activities of the proposed board would be to encourage the sale of bacon, beef and dairy products as well as grain.

Persian Balm promotes daintiness, charm and beauty. It is unrivaled in its magical effect on the skin. Swiftly absorbed by the tissues, it leaves never a vestige of stickiness. Delightfully cool to the skin. Stimulating and invigorating. Softens and makes the hands flawlessly white. Subtly fragrant. Imparts youth and loveliness to the complexion. Persian Balm is the inevitable choice of the woman who cares.

With reference to a newspaper statement that a harpocnist has been known to earn as much as \$200,000 in a season, an old lady writes suggesting that some of these musicians are overpaid.

A statue of Sir Ernest Shackleton, the Polar explorer, has just been erected outside the Royal Geographical Society's headquarters, London, England.

A hard day at the office, and a headache homebound bound. All for the want of two little tablets of Aspirin! Don't be helpless when you suddenly get a headache; carry Aspirin with you. The pocket tin doesn't take up any room, but what a comfort when it's needed!

Fatigue will frequently bring on a headache. It lowers the vitality and invites a cold. Take Aspirin and throaty off! Don't wait until you are miserable. There is nothing in Aspirin to hurt the heart or upset the stomach or harm the system in any way. Your doctor will tell you that! But, get Aspirin—not a substitute!

Follow the proven directions to be found inside each package. They cover colds, sore throat, headache, toothache, neuritis, neuralgia, sciatica, lumbago or rheumatism, muscular pains, and other pains and aches for which these tablets are a positive antidote. Keep your pocket tin filled from the bottle of 100 tablets. Every drug store has Aspirin in bottles, as well as the familiar little box.

Aspirin is made in Canada.

ASPIRIN

(TRADE-MARK REG.)

## The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter. All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per count line. Legal advertising, 15c per count line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

Messrs. C. Grupp and Vern Bassart were Cereal visitors, Wednesday.

The regular meeting of the Chinook Women's Institute will be held May 4 at 3 p.m. at the home of Mrs. C. Petersen; Mrs. Dawson and Mrs. P. Petersen, assistant hostesses. After regular business is finished program will be in charge of Mrs. Rideout, committee—League of Nations, National Events and Canadianization, Roll Call, "Canadians, and why." All ladies are cordially invited.

## Five-Day Rainfall for Chinook District

On Wednesday evening rainfall started and did not clear up until Monday noon of the following week. The whole district has been saturated. There has not been so much moisture for a number of years and this district has great reason to be thankful as the rain came steadily down without a storm, as in many districts so much damage had been done to property by snow, sleet and a terrific blizzard.

Everyone now feels optimistic for the future. Very little seeding had been done before the rain which will be of benefit as the weeds will grow rapidly and will enable the farmers to kill them before seeding.

## Heathdale Items

Mr. Scott, the public school inspector, paid a visit to Clover leaf and Heathdale schools last Wednesday.

Rain came in this district last Wednesday evening and continued until Monday morning. It was badly needed as there was not enough moisture on the summerfallow to even start germination of the grain.

## Takes Over Chinook Hotel Dining Salon

Myrtle Erickson has taken over the dining salon in the Chinook Hotel from May 1 and will be pleased to accept boarders at only \$35 per month for three real home cooked meals each day. She has also made arrangements with Captain Peters to rent rooms at \$10 per month to her boarders. We wish her every success in her undertaking.

The Chinook tennis club re-organized for this year last Wednesday evening when the following officers were elected: A. V. Youell, pres.; E. E. Jacques, vice pres.; Mrs. Murray, sec. Fees were set at men, \$1; ladies, \$1.50; juniors, \$1.00. Juniors include all public and high school scholars. Owing to teachers being away during the holidays, their fees were set at ladies, \$1, men, \$2. The season will start with a tournament.

## Heard Around Town

'Taint what we have  
But what we give,  
'Taint what we are  
But how we live,  
'Taint what we do  
But how we do it,  
That makes this life  
Worth going through it.

Dr. Esler, of Cereal, paid: Chinook a professional call Monday.

The U.S. government has found a way out. It has started to tax chewing gum.

In this issue appears an advertisement for the Goodyear Tire Co., for whom Cooley Bros., of the Service Garage are representatives, offering a \$3,000 prize contest.

Mrs. Walter G. Bremner was in Cereal last Thursday for a short visit with her parents, Dr. and Mrs. J. Esler, before her departure for Vancouver, where her husband has been sent by his firm.

Mrs. N. D. Stewart has received word of the sudden death of her brother, Alexander Edwin McColl, of Ottawa, Ont., who passed away on Tuesday, April 26. Mr. McColl was in his 60th year and was a veteran of the Boer war.

J. R. Tillotson, who has been employed in the Royal Bank, Cereal, for the past year or more, has severed his connections with that institution and left for his home at Okotoks. James Smith, from the Royal Bank, Pincher Creek, Alta, has taken the position of teller/keeper in the bank at Cereal.

The question of the hour—What? when? and where? is the Capt. going to do with the building he intends to move here from Youngstown. And another important question, how much did he pay for it? We would answer the curious, only we have not been let into the Captain's future secret plans.

Another improvement in the Chinook hotel ballroom is the change of the orchestra platform which adds considerable to the dancing floor space which will now comfortably hold seven hundred guests. All we can say is that the Capt. deserves credit for all the improvement he has made to the hotel since taking it over and deserves the wholehearted co-operation of every farmer, merchant and citizen.

## Outside Attacks on Wheat Pool

The attention of the House of Commons has been drawn to a series of newspaper articles concerning the Canadian Wheat Pools, which appeared in some leading United States newspapers recently, among them the Chicago Tribune. There were so many misrepresentations in the articles that no one with any knowledge of these organizations would give them serious consideration. Hon. H. H. Stevens, minister of trade and commerce, very effectively disposed of the charges embodied in them by labeling them exaggerated untruths. He stated that the Canadian Wheat Pools are now functioning efficiently with the wide spread support of grain growers in the prairie provinces.

It is noticeable that much of the criticism directed against the pools a year or two ago has died. There is a disposition everywhere discernible to give them a fair show. It has been made apparent that these former organizations were among the first victims of a depression that has levied exceedingly heavy toll among even the greatest of commercial enterprises, not only in Canada but throughout the world. Private grain firms of former standing have been hard hit as well.

The Wheat Pools are facing the present situation fairly and squarely, have assumed their obligations and are courageously undertaken to meet them in full. Their system of operation has been changed to meet the emergency and with any kind of good fortune they should eventually win back their way to solid financial ground.—Calgary Herald.

Diner—Two eggs and a piece of ham, please.

Waiter—(shouting down speaking tube)—send up two cakes and a grunt.

## Farmers!

who have to lay over in town can secure sleeping accommodation at the CHINOOK HOTEL (on top floor) for 50 cents

Renew your subscription to the Chinook Advance

## Job Printing

in all its branches promptly and neatly executed and at prices that will compete with outside firms.

## Chinook Advance

## 75 Miles of Phone Lines Down

As a result of the recent wind and snow storm seventy-five miles of telephone lines between Calgary and Three Hills were down. Nearly 3,000 are involved in the wreckage, only 200 poles were left standing at a stretch.

Six miles south of Beiseker the poles were all down, and the same condition existed in the towns of Beiseker, Strathmore and Three Hills. For three miles east and three miles west of Strathmore all poles were down. The same conditions exist of the 13 mile stretch east of Vulcan.

Two miles of poles were down between Sylvan Lake and Red Deer and for the same distance east of Olds.

Several hundred poles were down between Rockyford and Drumheller.

All rural lines were in bad shape. Hundreds of miles of copper wire will be rendered useless by the storm.

## Our Chinook Main Street

It surely must be wonderful for the old-time established merchants who have been in business here for ages to look upon our beautiful, sanitary main street after the four day rain. A more handsome place could hardly be enjoyed by pigs. Such a lovely place to take a mud bath. Let's get out and make mud pies and sling mud at each other—great sport!

Gee whiz! If mother dear could only see us now after rolling down the muddy business section of Chinook, what would we get when we got home? Ha, ha, I'll tell you, then why shouldn't the other fellow who neglected muddy main street not get it too?

Yours for beauty,  
Capt. Peters

An Alberta farmer went to town, and needing some lunch, slipped into a restaurant and got two fried eggs. He had no money, so he paid for his meal with two dozen fresh eggs.

Stand in the other fellow's shoes before you criticize or condemn him

## Father of Mrs. W. E. Brownell Passes Away.

The Osmond Republican, U.S.A., reports the death of Mr. Frank Lambert as follows:

"With the death of Frank Lambert at the home of his daughter, Mrs. Hans Nelson, there passed from the ranks of the early Pierce county settlers another pioneer to whom succeeding generations owe a tribute for the greatness that followed their labors in the comparatively new country. And before his arrival to the Osmond vicinity in 1885, Mr. Lambert was listed with that hardy contingent of early day settlers who as far back as 1870 came to Madison county where, on his homestead, he had a hand in the development of that section. He resided on his farm 3 miles west of Osmond until 1901 when he moved on to a farm near Foster, and since 1904, excepting the last week prior to his death lived in Plainville. He was a man of sterling character, thrifty, and one in whom dependence was not placed in vain.

Mr. Lambert was a native of Canada, having been born in St. David Providence, Quebec, June 3, 1843. He remained there until the year 1859 when he migrated to United States, first settling in Vermont in which place he devoted himself to farm labors. He came westward and was a resident of Wisconsin in his younger years where he found employment in the lumber camps. About the year 1866 he moved onward to Marquette, Michigan, where he worked in the iron mines and it was there that he met and on February 16, 1867, married Anna Christians. The lure for agricultural pursuits brought him to Nebraska in 1870, first coming to the Norfolk neighborhood and, has stated above in '85, arriving to this part of Pierce county.

Success crowned his efforts here and the farms owned by Mr. Lambert during his lifetime bear evidence of his labors for the development of the land. Of 12 children born to Mr. and Mrs. Lambert, eight survive. The devoted wife passed on to eternity on Oct. 17, 1917. Mr. Lambert married in November 1919 Mrs. Sina Nelson and on December 27, 1930, she too was called to eternity. Since that time the now deceased has made his home with his daughter, Mrs. Bush, of Plainville. The children of this early pioneer are Virginia V. Bush, W. J. Lambert and Hattie M. Eichberg of Plainville, Amanda E. Timmerman of O'Neil, A. J. Lambert of Monterey, Calif., G. T. Lambert of Creighton, Jeanette S. Brownell of Warba, Minn., and L. W. Nelson of Osmond.

Teachers of all schools entered in Chinook and District school fair, urge their scholars to plant seeds as soon as weather permits.
